# ADOLESCENT & CHILDREN'S REHABILITATION PROGRAM

**OUTPATIENT / REHABILITATION DAY PROGRAM  
LINCOLN CAMPUS**

**630**

## NEW PATIENTS

IN ONE OR MORE OF THE FOLLOWING AREAS

- **Rehabilitation Day Program (RDP)**—an intense, coordinated outpatient program.
- **Traditional Outpatient (OP)**—Physical, Occupational and/or Speech Therapy 1-3 times per week. Rehabilitation Psychology available.
- **Specialty Clinics and Assessments**—specialized services focused on areas such as vision, swallowing, wheelchair mobility, communication or long term follow-up.

Madonna TherapyPlus served children and adolescents with brain injury, stroke, spinal cord injury (SCI), orthopedic conditions, developmental disabilities and general neurological conditions.

Condition	# Served
Brain Injury	158
Cancer	2
COVID	1
Neuro/ Developmental Disability	264
Ortho/General	198
Spinal Cord Injury	5
Stroke	2

## AMOUNT OF THERAPY

Treatment plans are designed to meet individual needs and insurance coverage. The following illustrates the average number of visits received last year:

Lincoln RDP	BI	SCI	Cancer	Neuro	General Rehab
<b>PT</b>	31	7	N/A	8	15.5
<b>OT</b>	20	8	N/A	8.5	14
<b>ST</b>	N/A	N/A	N/A	1	5.5

Lincoln OP	BI	SCI	Cancer	Neuro	General Rehab
<b>PT</b>	7.3	1	33	8.8	16.4
<b>OT</b>	12.5	3	N/A	14.6	12
<b>ST</b>	3.2	N/A	N/A	19.4	13.2

As appropriate, children and adolescents also received recreational therapy, social work services, rehabilitation nursing, rehabilitation psychology and/or nutrition services as part of RDP.

## PATIENT SATISFACTION

- **95.8%** of RDP/OP families surveyed rated their overall experience as “excellent or good.”

## EDUCATION DURING THERAPY

Madonna RDP/OP offers access to the Therapeutic Learning Center (TLC). In TLC, a certified teacher works with students on their school assignments and with teachers in the student's school to ensure a smooth transition.

## UNPLANNED TRANSFERS TO ACUTE CARE

Last year **2** children and adolescents were unexpectedly admitted back to an acute care hospital while receiving outpatient services.

## EXPECTED OUTCOMES

While individual results vary, last year most adolescents and children were able to take care of themselves, communicate and either walk or use a wheelchair independently with age appropriate supervision. Some required adaptive equipment to help them be independent.

## INDEPENDENCE LEVEL

Patients admitted into Madonna's pediatric RDP/OP demonstrated progress based on two outcome measurement tools depending on age. Wee Functional Independence Measure (WeeFIM) is used for patients age 0-7 and the Functional Assessment Measure (FAM) is used for patient age 8-18. Activities such as walking, taking care of themselves, communicating and thinking skills are rated on a scale of 1-7 and then totaled. Patients are assessed at time of admission and again at discharge to determine WeeFIM or FAM gains.

### WeeFIM (0–7 years old)

Lincoln	Average Gain
Outpatients	7.5
Rehab Day Patients	14.0

### FAM (8–18 years old)

Lincoln	Average Gain
Outpatients	7.9
Rehab Day Patients	16

## ACCREDITATION

Madonna Rehabilitation Hospitals are accredited by CARF, the Commission on Accreditation of Rehabilitation Facilities, as an Outpatient Medical Rehabilitation Program and Pediatric Specialty Program.
