### AVERAGE THERAPY HOURS

Last year, persons within the children's rehabilitation unit had an average of **3.4 hours** of physical, occupational, speech, rehabilitation psychology, and/or recreation therapy per day, 5 days a week, delivered by licensed therapists. As appropriate, you may also receive respiratory and nutrition therapy as well.

### TRANSFERS TO ACUTE

Last year **10%** percent of pediatric patients returned to the hospital for either planned or unplanned reasons.

### PATIENT SATISFACTION

**83.1%** of pediatric patients rated their overall experience as excellent or good.

### DISCHARGE TO HOME/COMMUNITY

**85%** were discharged to a community setting, exceeding other hospitals in the nation.

### INDEPENDENCE LEVEL

Patients with brain injury in Madonna's acute rehab program made more progress toward independently being able to do activities such as walking, taking care of themselves, communicating and thinking than at other regional and national facilities. Improvement is measured using the Functional Independence Measure (FIM) which includes these activities, each rated on a 1-7 scale and totaled.
