

**Madonna Rehabilitation Hospitals -
Outpatient/Rehabilitation Day Program**

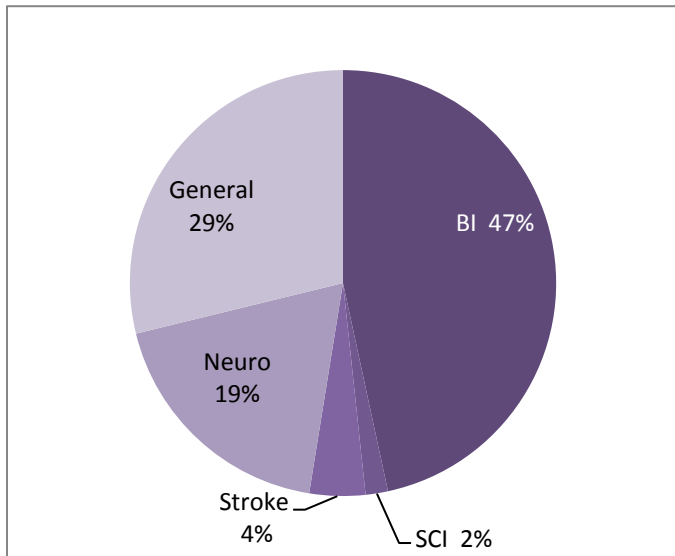

OMAHA Campus

**How much experience does Madonna
TherapyPlus have treating people like me?**

99 new children and adolescents with a variety of diagnoses were served in one or more of the following areas:

- Rehabilitation Day Program (RDP)—an intense, coordinated outpatient program.
- Traditional Outpatient (OP)—Physical, Occupational, and/or Speech Therapy 1-3 times per week. Rehabilitation Psychology available.

Madonna TherapyPlus served children and adolescents with brain injury, stroke, orthopedic conditions, developmental disabilities and other neurological conditions.

How much therapy will my child or adolescent have?

- Treatment plans are designed to meet individual needs. Last year, the following illustrates the average number of visits received:

Omaha RDP	BI	Stroke	Neuro	General Rehab
PT	14.7	18	NA	27
OT	14.7	18	NA	27
ST	14	17	NA	20

Omaha OP	BI	Stroke	Neuro	General Rehab
PT	9.1	31.5	25.5	24.3
OT	6.1	17	17.4	19.8
ST	7.5	10	12.5	18.4

- Most children and adolescents also received recreational therapy, social work services, rehabilitation nursing, and neuropsychology and/or nutrition services as part of RDP.

What do other people say about their experience at Madonna Therapy Plus?

- 88% of RDP/OP families surveyed rated their overall experience as “excellent”.
- 94% of families surveyed said they would “definitely” recommend Madonna Therapy Plus to family and friends.

How will Madonna help my child or adolescent keep up with school?

Since opening adolescents and children spent time in the Therapeutic Learning Center (TLC). Here, a certified teacher works with students on their school assignments and with teachers in the student’s home school to make sure the transition back is smooth.

Adolescent & Children's Rehabilitation Program

Fast Facts FAQs July 1, 2017–June 30, 2018

What kinds of improvements can I expect?

While individual results vary, last year, most adolescents and children were able to take care of themselves, communicate and either walk or use a wheelchair independently with age appropriate supervision. Some required adaptive equipment to help them be independent. The measurable change experienced by patients was above targets as measured by change from admission to discharge on the Functional Assessment Measure (FAM).

What happens after my child is discharged?

Many adolescents and children who have had a disabling injury or illness require therapy on an intermittent basis. Long-term follow up survey at six months adolescent or child was discharged from Madonna revealed:

- 100% of adolescents and children had made additional functional gains or stayed the same.
- 12% experienced unplanned re-hospitalization following discharge.
- 100% returned to school 6-12 months after discharge.

Is Madonna accredited?

Yes, by CARF, the Rehabilitation Accreditation Commission, as a Stroke Specialty Program. In April 2018 Madonna earned the highest accreditation level possible—three years
