## AMOUNT OF THERAPY

Treatment plans are designed to meet individual needs and insurance coverage. The following illustrates the average number of visits received last year:

| Omaha RDP | BI  | SCI | Cancer | Neuro | General Rehab |
|-----------|-----|-----|--------|-------|---------------|
| <b>PT</b> | 7.6 | 15  | 16     | N/A   | N/A           |
| <b>OT</b> | 8.6 | 12  | 16     | N/A   | N/A           |
| <b>ST</b> | 7.5 | 6   | 0      | N/A   | N/A           |

| Omaha OP  | BI   | SCI | Cancer | Neuro | General Rehab |
|-----------|------|-----|--------|-------|---------------|
| <b>PT</b> | 16.4 | 15  | 45     | N/A   | 16.1          |
| <b>OT</b> | 14.8 | 8.7 | 38.8   | N/A   | 15.2          |

### EDUCATION DURING THERAPY

Madonna RDP/OP offers access to the Therapeutic Learning Center (TLC). In TLC, a certified teacher works with students on their school assignments and with teachers in the student's school to ensure a smooth transition.

### UNPLANNED TRANSFERS TO ACUTE CARE

Last year **1** children and adolescents were unexpectedly admitted back to an acute care hospital while receiving outpatient services.

### EXPECTED OUTCOMES

While individual results vary, last year most adolescents and children were able to take care of themselves, communicate and either walk or use a wheelchair independently with age appropriate supervision. Some required adaptive equipment to help them be independent.

### INDEPENDENCE LEVEL

Patients admitted into Madonna's pediatric RDP/OP demonstrated progress based on two outcome measurement tools depending on age. Wee Functional Independence Measure (WeeFIM) is used for patients age 0-7 and the Functional Assessment Measure (FAM) is used for patient age 8-18. Activities such as walking, taking care of themselves, communicating and thinking skills are rated on a scale of 1-7 and then totaled. Patients are assessed at time of admission and again at discharge to determine WeeFIM or FAM gains.

#### WeeFIM (0-7 years old)

| Omaha              | Average Gain |
|--------------------|--------------|
| Outpatients        | 9.8          |
| Rehab Day Patients | 7.0          |

#### FAM (8-18 years old)

| Omaha              | Average Gain |
|--------------------|--------------|
| Outpatients        | 7.75         |
| Rehab Day Patients | 28.5         |

### ACCREDITATION

Madonna Rehabilitation Hospitals are accredited by CARF, the Commission on Accreditation of Rehabilitation Facilities, as an Outpatient Medical Rehabilitation Program and Pediatric Specialty Program.
