<tbody>
<tr>
<td>Physical Therapy</td>
<td>14.9</td>
<td>16.3</td>
</tr>
<tr>
<td>Occupational Therapy</td>
<td>16.1</td>
<td>15.1</td>
</tr>
<tr>
<td>Speech Therapy</td>
<td>16</td>
<td>16.2</td>
</tr>
</tbody>
</table>

LENGTH OF PROGRAM

Indians with stroke attended RDP for an average of 19.2 days.

EXPECTED OUTCOMES

While individual results vary, last year most individuals with stroke were functioning at a supervision level at the time of discharge.

PATIENT SATISFACTION

- 87.5% of people in RDP/OP with stroke rated their overall experience as “excellent.”
- 91.7% said they would “definitely” recommend Madonna TherapyPlus to family and friends.

As appropriate, people with stroke also received recreational therapy, social work services, rehabilitation nursing, rehabilitation psychology and/or nutrition services as part of RDP.
LIFE AFTER REHABILITATION

Individuals in RDP are encouraged to participate in activities which promote community re-entry and resumption of life roles, including:

- Independent Living Skills Training
- Adaptive Sports & Recreation
- Transitions Group (community living, advocacy, adjustment)
- Work Re-Entry

DISCHARGE TO HOME/COMMUNITY

Many individuals will require intermittent outpatient therapy after their discharge from RDP. Depending upon where you live, this could occur here or in your home community. Madonna contacts people 6-12 months after inpatient discharge. Here are some of the reported outcomes:

91.9% maintaining gains
29.7% re-hospitalized
38.8% returned to work or school
48.6% driving or independently managing public transportation

ACCREDITATION

Madonna Rehabilitation Hospitals are accredited by CARF, the Commission on Accreditation of Rehabilitation Facilities, as an Outpatient Medical Rehabilitation Program and Stroke Specialty Program.
