Treatment plans are designed to meet individual needs and insurance coverage. The following illustrates the average number of visits received last year:

- Rehabilitation Day Program (RDP) – an intense, coordinated outpatient program.
- Traditional Outpatient (OP) – Physical, Occupational and/or Speech Therapy 1-3 times per week. Rehabilitation Psychology available.
- Specialty Clinics and Assessments – specialized services focused on areas such as vision, swallowing, wheelchair mobility, communication or long term follow-up.

Madonna TherapyPlus served children and adolescents with brain injury, stroke, spinal cord injury (SCI), orthopedic conditions, developmental disabilities and general neurological conditions.

**AMOUNT OF THERAPY**

As appropriate, children and adolescents also received recreational therapy, social work services, rehabilitation nursing, rehabilitation psychology and/or nutrition services as part of RDP.
PATIENT SATISFACTION

- **88.6%** of RDP/OP families surveyed rated their overall experience as “excellent.”
- **100%** said they would “definitely” recommend Madonna TherapyPlus to family and friends.

EDUCATION DURING THERAPY

Madonna RDP/OP offers access to the Therapeutic Learning Center (TLC). In TLC, a certified teacher works with students on their school assignments and with teachers in the student’s school to ensure a smooth transition.

EXPECTED OUTCOMES

While individual results vary, last year most adolescents and children were able to take care of themselves, communicate and either walk or use a wheelchair independently with age appropriate supervision. Some required adaptive equipment to help them be independent.

DISCHARGE TO HOME/COMMUNITY

Many adolescents and children will require intermittent outpatient therapy after their discharge from RDP. Depending upon where you live, this could occur here or in your home community. Madonna contacts patients 6-12 months after inpatient discharge. Here are some of the reported outcomes:

- **96%** of adolescents and children had made additional functional gains or stayed the same
- **88%** returned to school 6-12 months after discharge

ACCREDITATION

Madonna Rehabilitation Hospitals are accredited by CARF, the Commission on Accreditation of Rehabilitation Facilities, as an Outpatient Medical Rehabilitation Program and Pediatric Specialty Program.
