

ADOLESCENT & CHILDREN'S REHABILITATION PROGRAM

OUTPATIENT / REHABILITATION DAY PROGRAM
OMAHA CAMPUS

136 NUMBER OF PEOPLE SERVED IN ONE OR MORE OF THE FOLLOWING AREAS

- **Rehabilitation Day Program (RDP)**—an intense, coordinated outpatient program.
- **Traditional Outpatient (OP)**—Physical, Occupational and/or Speech Therapy 1-3 times per week. Rehabilitation Psychology available.

Madonna TherapyPlus served children and adolescents with brain injury, stroke, spinal cord injury (SCI), orthopedic conditions, developmental disabilities and other neurological conditions.

Condition	# Served
Brain Injury	42
Stroke	9
Spinal Cord Injury	5
Cancer	8
Ortho	26
Neuro	46

AMOUNT OF THERAPY

Treatment plans are designed to meet individual needs and insurance coverage. The following illustrates the average number of visits received last year:

Omaha RDP	BI	Stroke	Neuro	General Rehab
PT	16.9	12	N/A	13.5
OT	15.8	12	N/A	13.5
ST	16.4	N/A	N/A	18

Omaha OP	BI	Stroke	Neuro	General Rehab
PT	21.1	24.6	19.7	32.9
OT	14.7	30.3	19.4	29.8
ST	16.4	6.5	16.7	33.4

As appropriate, children and adolescents also received recreational therapy, social work services, rehabilitation nursing, rehabilitation psychology and/or nutrition services as part of RDP.

PATIENT SATISFACTION

- **100%** of RDP/OP families surveyed rated their overall experience as “excellent.”
- **100%** said they would “definitely” recommend Madonna Therapy Plus to family and friends.

ACCREDITATION

Madonna Rehabilitation Hospitals are accredited by CARF, the Commission on Accreditation of Rehabilitation Facilities, as an Outpatient Medical Rehabilitation Program and Pediatric Specialty Program.

EDUCATION DURING THERAPY

Madonna RDP/OP offers access to the Therapeutic Learning Center (TLC). In TLC, a certified teacher works with students on their school assignments and with teachers in the student's school to ensure a smooth transition.

EXPECTED OUTCOMES

While individual results vary, last year most adolescents and children were able to take care of themselves, communicate and either walk or use a wheelchair independently with age appropriate supervision. Some required adaptive equipment to help them be independent.
