

MADONNA REHABILITATION DAY PROGRAM OMAHA

The Madonna Rehabilitation Day Program-Omaha (RDP) is coordinated outpatient therapy dedicated to help adults and children with a physical or cognitive disability learn to function more independently in their home and community. RDP provides an intense and holistically-oriented approach that includes medical monitoring, coordinated therapies and education.

AVERAGE AMOUNT OF THERAPY

Treatment plans are designed to meet individual needs and insurance coverage. The graph below indicates, on average, the number of days patients received therapy last year:

Therapy	Days
Physical	12
Occupational	12
Speech	10

79 NUMBER OF PEOPLE SERVED

Program	# Served
Brain Injury	29
Stroke	27
Neuro	4
Spinal Cord Injury	5
Cancer	4
Other	10

The average age was 40 years old, including 21 children and adolescents.

As a part of RDP, patients may also receive recreational therapy, social work services, rehabilitation nursing, rehabilitation psychology and/or nutrition services.

PATIENT SATISFACTION

100% of people in RDP rated their overall experience as excellent.

100% of people in RDP said they would definitely recommend Madonna to family and friends.

INDEPENDENCE LEVEL

Patients in Madonna’s Rehabilitation Day Program made progress toward independence as measured by the Functional Assessment Measure (FAM). Activities including cognitive, behavioral, communication and communication functioning are rated on a 1-7 scale and totaled. On average, people in RDP admitted requiring minimal assistance and discharged requiring supervision to modified independent level of care. Below is a representation of average FAM score change in RDP:

DISCHARGE

Many individuals will require intermittent outpatient therapy after their discharge from RDP. Depending upon where you live, this could occur at Madonna or in your home community.

ACCREDITATION

Madonna Rehabilitation Hospitals has received the highest possible level of distinction from the Commission on Accreditation of Rehabilitation Facilities (CARF) for its overall Outpatient Medical Rehabilitation Program as well as its outpatient Brain Injury, Stroke and Pediatric Specialty Programs.

LENGTH OF STAY

Patients are seen 3-5 days per week while in RDP. Last year, adults attended RDP for an average of 17 non-consecutive days. Children and adolescents attended an average of 16 non-consecutive days.
