## TRANSFERS TO ACUTE

Madonna is a hospital with clinical staff on-site 24 hours a day, seven days per week. Clinical staff are trained to respond to any medical emergency.

Last year, **21** individuals (5.5%) with a stroke transferred to acute care and **20** of those were for unplanned reasons. This is significantly less than other hospitals in the region (8.4%) and nation (10.1%).

## INDEPENDENCE LEVEL

Patients recovering from stroke at Madonna made similar gains (26.6 points) compared to the nation (24.9 points) as measured by the “Self-Care and Mobility Activities” tool. This progress is calculated by rating activities such as mobility, self-cares, communication and cognition on a scale of 1-6 and totaling the categories.

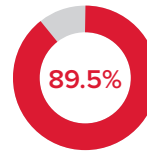

## LENGTH OF STAY

Individuals with a stroke stayed at Madonna’s acute rehab an average of **23.2** days.

## FOLLOW UP 6 MONTHS AFTER DISCHARGE

97.7% of people with stroke state that they maintained or improved since their discharge in areas such as self-cares, mobility, communication and thinking skills.

89.5% of people with stroke state that they are able to access the things they need in their community.

58.1% of people with stroke have returned to work or school.
