

# MADONNA (MRH) INPATIENT STROKE PROGRAM OUTCOMES

## 359 NUMBER OF PEOPLE SERVED

**359** people were served by acute rehabilitation, **218** in Omaha and **141** in Lincoln. **187** had left brain strokes and **119** had right brain strokes. **10** had bilateral strokes and the remaining **43** had another medical event affecting their brain.

The average age was **67.2** years old, including **17** children and adolescents.

Age	# Served
0-18	6
19-34	9
35-64	110
65+	234

## WHERE PATIENTS COME FROM

Hospitals throughout the United States refer patients with a stroke to Madonna. Last year, more than **24.5%** of stroke patients came from areas outside of Nebraska.

## AVERAGE THERAPY HOURS

Last year, people with a stroke had an average of **3.9 hours** of physical, occupational, speech, rehabilitation psychology, and/or recreational therapy per day, 5 days a week, delivered by licensed therapists.

As appropriate, patients may also receive respiratory and nutrition therapy.

## DISCHARGE TO HOME/COMMUNITY

**67.7%** of people with stroke at our acute rehabilitation hospitals discharged to a community setting.

## PATIENT SATISFACTION

**98.7%** of people with stroke rated their overall experience as excellent or good.

## INPATIENT STROKE PROGRAM OUTCOMES

### TRANSFERS TO ACUTE

Madonna is a hospital with clinical staff on-site 24 hours a day, seven days per week. Clinical staff are trained to respond to any medical emergency.

Last year, **35** individuals (9.7%) with a stroke transferred to acute care and **29** of those were for unplanned reasons. This is significantly less than other hospitals in the region (11.5%) and equal to the nation (9.7%).

### INDEPENDENCE LEVEL

Patients with a stroke in Madonna's acute rehab program made more progress toward independently being able to do activities than at other regional and national facilities as measured by the Functional Independence Measure (FIM). Activities such as walking, taking care of themselves, communicating and thinking skills are rated on a FIM scale of 1-7 and then totaled.

### LENGTH OF STAY

Individuals with a stroke stayed at Madonna's acute rehab an average of **22.1** days.

### FOLLOW UP 6 MONTHS AFTER DISCHARGE

93.1% of people with stroke state that they maintained or improved since their discharge in areas such as self-cares, mobility, communication and thinking skills.

95.8% of people with stroke state that they are able to access the things they need in their community.

38.2% of people with stroke have returned to work or school.
