

# MADONNA (MRH) INPATIENT STROKE PROGRAM OUTCOMES

## 569 NUMBER OF ADMISSIONS

**342** persons were served by acute rehabilitation, **205** in Omaha and **137** in Lincoln. **149** had left brain strokes and **121** had right brain strokes. **35** had bilateral strokes with the remaining **37** having an other medical event affecting their brain.

The average age was **64.9** years old, including 17 children and adolescents.

AGE	NO. SERVED
0-18	9
19-34	8
35-65	135
65+	190

## WHERE PATIENTS COME FROM

Hospitals throughout the Midwest refer patients with a stroke to Madonna. Last year, more than **25%** of patients with a stroke came from areas outside of Nebraska.

## AVERAGE THERAPY HOURS

Last year, people with a stroke had an average of **4 hours** of physical, occupational, speech, rehabilitation psychology, and/or recreational therapy per day, 5 days a week, delivered by licensed therapists.

As appropriate, you may also receive respiratory and nutrition therapy as well.

## DISCHARGE TO HOME/ COMMUNITY

**67%** of patients with stroke discharged to a community setting.

## PATIENT SATISFACTION

**99.4%** of patients with stroke rated their overall experience as excellent or good.

# MADONNA (MRH) INPATIENT STROKE PROGRAM OUTCOMES

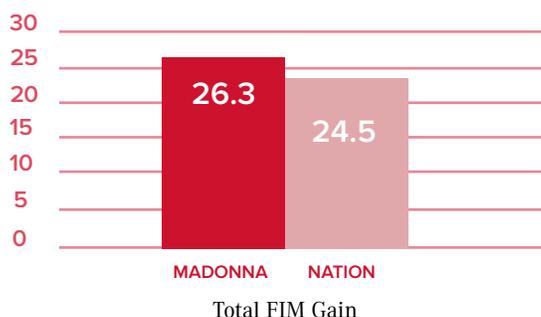

## TRANSFERS TO ACUTE

Madonna is a hospital with clinical staff on-site 24 hours a day, seven days per week. Clinical staff are trained to respond to any medical emergency.

Last year **28** individuals (8.1%) with stroke transferred to acute care and **24** of those were for unplanned reasons. This is significantly less than other hospitals in the region (9.63%) and nation (9.55%).

## INDEPENDENCE LEVEL

Patients with a stroke in Madonna's acute rehab program made more progress toward independently being able to do activities such as walking, taking care of themselves, communicating and thinking than at other regional and national facilities. Improvement is measured using the Functional Independence Measure (FIM) which includes these activities, each rated on a 1-7 scale and totaled.

## LENGTH OF STAY

Individuals with a stroke stayed at Madonna's acute rehab an average of **22.9** days.

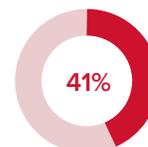

## FOLLOW UP 6 MONTHS AFTER DISCHARGE

95.7% of persons with stroke state that they maintained or improved since their discharge in areas such as self-cares, mobility, communication and thinking skills.

100% of persons with stroke state that they are able to access the things they need in their community.

41% of persons with stroke who were working or in school previously have returned to work or school.
