TRANSFERS TO ACUTE

Last year **7%** percent of pediatric patients returned to the hospital for either planned or unplanned reasons.

PATIENT SATISFACTION

89% of pediatric patients rated their overall experience as excellent.

AVERAGE THERAPY HOURS

Last year, pediatric patients had an average of **3 hours** of physical, occupational, speech, rehabilitation psychology, and/or recreation therapy per day, 5 days a week, delivered by licensed therapists.

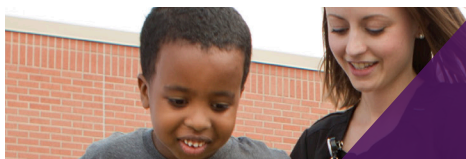

As appropriate, patients may also receive respiratory and nutrition therapy.

DISCHARGE TO HOME/COMMUNITY

83% of children were discharged to a community setting, exceeding other hospitals in the nation.

INDEPENDENCE LEVEL

Children admitted into Madonna's pediatric acute rehab program made more progress toward independently being able to do activities than at other regional and national facilities as measured by the Functional Independence Measure (FIM). Activities such as walking, taking care of themselves, communicating and thinking skills are rated on a FIM scale of 1-7 and then totaled. The average FIM gain of Madonna's pediatric patients last year was 30.
