

# MADONNA (MRH) INPATIENT BRAIN INJURY PROGRAM OUTCOMES

## 396 NUMBER OF PEOPLE SERVED

**396** people were served by acute rehabilitation, **199** in Omaha and **197** in Lincoln. **258** (69%) had traumatic brain injury and the remaining **134** (34%) had a non-traumatic brain injury such as encephalitis, infection or brain tumor.

The average age was **45.5** years old, including **66** children and adolescents.

Age	# Served
8-18	61
19-34	89
35-65	145
65+	91

## WHERE PATIENTS COME FROM

Hospitals throughout the United States refer patients with brain injury to Madonna. Last year, more than **45.7%** of brain injury patients came from areas outside of Nebraska.

## AVERAGE THERAPY HOURS

Last year, people with brain injury had an average of **3.2 hours** of physical, occupational, speech, rehabilitation psychology, and/or recreation therapy per day, 5 days a week, delivered by licensed therapists.

As appropriate, patients may also receive respiratory and nutrition therapy.

## DISCHARGE TO HOME/COMMUNITY

**78.2%** of people with brain injury at our acute rehabilitation hospitals discharged to community were discharged to a community setting, exceeding other hospitals in the nation (75.3%).

## PATIENT SATISFACTION

**98.2%** of people with brain injury rated their overall experience as excellent or good.

# MADONNA (MRH) INPATIENT BRAIN INJURY PROGRAM OUTCOMES

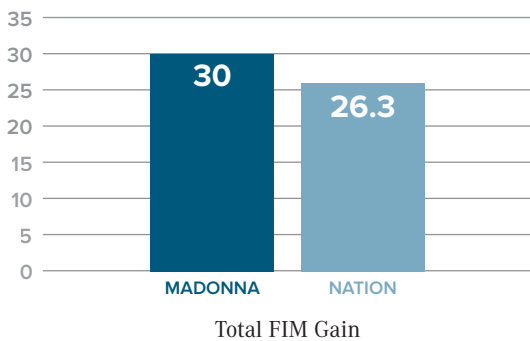

## TRANSFERS TO ACUTE

Madonna is a hospital with clinical staff on-site 24 hours a day, seven days per week. Clinical staff are trained to respond to any medical emergency.

Last year **10.3** percent of acute rehabilitation patients with brain injury returned to the hospital for either planned or unplanned reasons.

## INDEPENDENCE LEVEL

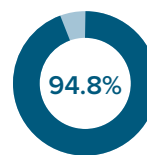

Patients with a brain injury in Madonna's acute rehab program made more progress toward independently being able to do activities than at other regional and national facilities as measured by the Functional Independence Measure (FIM). Activities such as walking, taking care of themselves, communicating and thinking skills are rated on a FIM scale of 1-7 and then totaled.

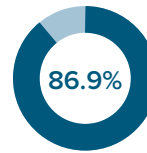

## LENGTH OF STAY

Individuals with brain injury stayed at Madonna's acute rehab an average of **30** days.

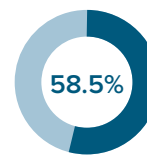

## FOLLOW UP AT 6 MONTHS AFTER DISCHARGE

94.8% of people with brain injury state that they maintained or improved since their discharge in areas such as self-cares, mobility, communication and thinking skills.

86.9% of people with brain injury state that they are able to access the things they need in their community.

58.5% of people with brain injury have returned to work or school.
